R&D funding record achieved at UL Lafayette

The University of Louisiana at Lafayette announced today that its Research and Development Survey has revealed yet another record-breaking year for research funding.

The University of Louisiana at Lafayette has achieved a remarkable milestone with $144 million in research funding for the fiscal year ending June 30, 2023. This marks a significant increase from the previous year's total of $126 million.

This achievement is a testament to the dedication and hard work of faculty, staff, and students across the university. It reflects a strong commitment to academic excellence and innovation, as well as a continued focus on addressing pressing global challenges.

The University's success in securing external research funding is not only a testament to the quality of its research and development efforts but also to its broad partnerships with industry and federal agencies.

This funding will support a wide range of projects and initiatives, from advanced materials research to renewable energy solutions, and will enable the university to continue pushing the boundaries of knowledge.

The University of Louisiana at Lafayette is committed to nurturing a diverse and inclusive research community, where ideas are fostered, collaborations are formed, and breakthroughs are made.

This record funding achievement is an encouraging sign for the future of research and development at UL Lafayette, and it is expected to continue driving progress and innovation in the years to come.
